Student Teaching Weekly Reflections

Name: ________________________________ Grade/Subject: __________________
School: ____________________________ Teacher: __________________________
Week of ____________________________ to ____________________________

REQUIREMENTS:
Word process a reflection of your week's experiences that may include highlights of any or all of the following:

• Observations you have recorded about classroom, students, teacher
• Insights or questions about your observations or activities
• Activities you observed or led
• Your proudest accomplishments
• Areas needing extra work
• Major goal for next week
• Area with which you'd like help from your supervisor
• Suggested seminar topics

This reflection should generate at least one to two typed pages. It would be advantageous to record your observations daily so that you will have some references from which to compose.

When completed, email these reflections (either within the text of an email message or as an email attachment in MS Word format only) to your student teaching supervisor. If you don't have a record of your Augsburg supervisor's email address, check for their address by clicking on the link located in the Communications Box--in the margin--within Moodle. A copy of your reflection should be placed in your student teaching binder or portfolio so that your supervisor can easily check them during each site visit.
